## TO THE NURSERY TRADE

In presenting you with our regular Fall wholesale trade list for this season we wish to thank our customers and friends for the liberal patronage given us in the past and we hope to have the pleasure of serving you more in the future.

In growing the stock listed herein we have tried to produce a quality of stock that will give entire satisfaction. In establishing the prices we have based them on the advantage that quantity production affords.

Our nursery being located here in the foothills of the Cumberland Mountains the climate is ideal for the production of hardy plants. The growing seasons are ideal for proper development and the winters are sufficient to insure hardy plants. We usually have heavy frosts in early October. Real winter usually sets in about December 20th and with it comes snow, ice and zero weather. Do not be misled into the idea that stock grown here is not hardy. With such weather how could it be otherwise? And each year for more than fifty has proven that it is hardy by our many satisfied customers in all States of the Union and parts of Canada, many who have been regular customers for many years.

Our storage and facilities are sufficient to properly handle and care for stock during such weather. Our stock is not "jammed up" in the fields, but is in rows properly spaced and cultivated thoroughly and frequently. Even our lining out stock is grown in open fields and should not be classed with stock grown in beds without room to develop. We do not sacrifice quality in order to reduce our investment. This is our 52nd year in the production and distribution of HARDY ORNAMENTAL PLANTS.

**PRICES.** Prices in this list cancel all previous quotations and are subject to change without notice.
